To strengthen the bearing in rigidifying push bar on VIP 2

Previous Appearance

Updated Appearance

- ✔ To strengthen the bearings in rigidifying push bar on VIP 2, the size of the bearings was changed from 6700ZZ to 6901-2RS. The appearance of the push handle is changed as a result.

From now on, when you have to replace a previous version bearing (6700ZZ), we suggest your technicians change both sides directly to the updated version(6901-2RS) to increase its service life.

- ✔ The updated version was implemented to the VIP2 that started by the batch of Serial No. TM22-003955 on 2022 January 27th.
- ✔ The latest parts catalogue of VIP2, version 004, is already updated on Karma Website.
- ✔ The updated version is backward compatible with the existing one.
