

INTRODUCING  
**daytot** joey

Joey is an early intervention crawler designed to encourage the development of motor skills for babies at risk of delay.

daytotjoey

## For all their little journeys

For use during a baby's first 6 months at home, Joey helps enhance early motor skills, by encouraging independent movement on their tummy. Joey supports the baby, allowing them to move freely, while building the all-important foundations for their future physical and cognitive development.

Joey promotes tummy time and crawling - important floor-centred activities for building muscle strength, balance, coordination, and motor skills. Our clinical research shows that intervening early has a significant impact on a baby's ability to learn new skills and overcome motor challenges in their early years.

### KEY FEATURES

- Supportive 5-point harness
- Machine washable covers
- Moves 360° in any direction
- Adjusts for growing babies
- Soft detachable bibs
- Lightweight & durable

Bundle option available (Size 1 & 2)

Covers available in fabric & wipe clean vinyl

For further information, and to buy Joey, visit:

## Where remarkable journeys start

Research shows that early intervention programmes and products that allow therapists and parents to work together, like Joey does, have a greater influence on a child's future development.

At Daytot, we believe that by intervening from day one, you can help babies at risk of delay catch up and make progress towards achieving age-appropriate developmental milestones.

Recommended Accessory

## daytot activity mat

Scientific research shows that the use of high contrasting colours, such as black & white shapes scaled to a specific ratio, supports visual & cognitive development, and stimulates quadrupedal (four-footed) movement in newborns – the building blocks for learning to crawl.

Our bespoke black & white mat pattern promotes infant visual development, while providing the best possible training surface for use with the Daytot Joey.

### Joey Sizing Guide

Size	Max Weight	Age Range (approx.)
Size 1	5kg / 11lbs	0-2 months
Size 2	10kg / 22lbs	2-6 months

# River's Story

River is a 7-month-old ray of sunshine. Shortly after birth, River was diagnosed with Down Syndrome. Working alongside a Paediatric Physiotherapist, her mum has been using Joey at home to develop River's early tummy time, crawling and motor skills.

River has now progressed to weight-bearing on all 4's, rolling both ways, and is sitting independently. She should soon progress to independent 4-point crawling.

A product that promotes tummy time and crawling is to be applauded. River's mum was motivated and able to use the Joey daily, alongside general physiotherapy advice and exercises given to all parents of a child with Down Syndrome to encourage and promote maximum motor development.

The benefits of achieving the motor milestone of crawling for any infant, and especially a child with Down Syndrome is vast and must be encouraged.
