

NEW AND IMPROVED

# Patient Assist Rail

Minimising the risk of entrapment when a bed stick is required.

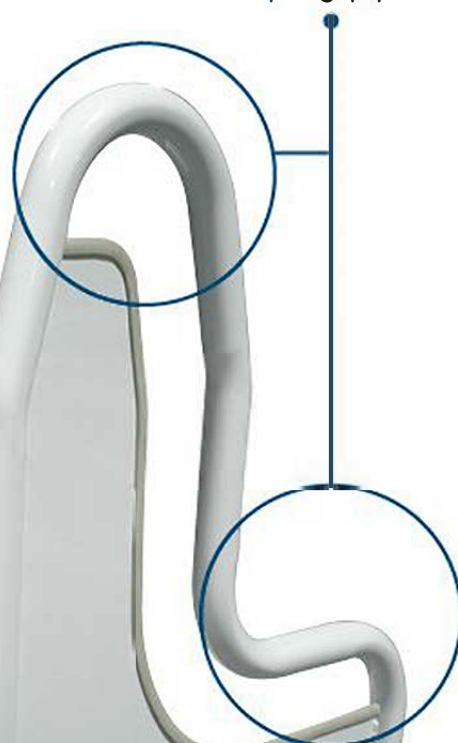

## FEATURES

- Designed to assist patients when getting in and out of bed
- Slides under the mattress for easy application
- Suitable for use in any size beds
- Powder coated tubular steel frame
- Assists user to change positions in bed
- Multiple grip points
- Enclosed return to minimize injury

45mm gap between shield and bar, leaving enough room for a safe and comfortable grip

Multiple grip points

Can be used on base with slats due to the unique enclosed base
